Summary

Full-stack Software Engineer and Computer Science graduate (CGPA 8.64/10) who has completed a three-month Software Engineering internship at Lexon IT, building and shipping a production-ready, multi-portal job-application platform (AutoHirU) to a live deployment at autohiru.com and deploying the Karnish Travels admin and accounting platform to DigitalOcean. Also independently designed, built, and deployed seven other production-grade applications spanning AI/LLM orchestration, machine learning, and full-stack web development. Skilled in Java/Spring Boot backends, React/Next.js frontends, relational and graph/vector databases, and cloud deployment (AWS, Railway, Cloudflare Workers, Docker). Published IEEE-format research on ML-driven Android malware detection at an international conference. Strong foundation in Data Structures, Algorithms, System Design, and Machine Learning evaluation, with a track record of taking projects from a model or rules engine to a live, publicly usable product.

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, HTML5/CSS3, Tailwind CSS, shadcn/ui, Chrome Extensions
Backend: Spring Boot, Spring Security/JWT, Hibernate, REST APIs, Flask, Node.js, Clerk Authentication
AI / ML: LLM Tool-Calling & Orchestration, Prompt Engineering, Model Evaluation, Scikit-learn, Random Forest, CNN/LSTM
Cloud & DevOps: AWS (EC2, S3, Lambda, IAM, CloudWatch), Railway, Cloudflare Workers, DigitalOcean, Render, Vercel, Docker, Jenkins CI/CD, GitHub Actions, Git
Databases: MySQL, PostgreSQL (Neon), MongoDB, Neo4j, JDBC
Data & Analytics: Power BI, Tableau, Alteryx, Pandas
Core Concepts: OOP, Data Structures & Algorithms, MVC Architecture, System Design

Experience

Software Engineering Intern **Aug 2026 – Nov 2026**
Lexon IT *India*

- Built **AutoHirU**, a job-application platform, from scratch over a 3-month internship and took it to a production-ready, publicly deployed release on its own domain (autohiru.com): student portal, recruiter portal, admin console, and a Chrome extension, with a Next.js frontend and an API with PostgreSQL deployed on Railway.
- Developed the **Auto Apply engine** and companion Chrome extension that discovers jobs, fills application forms from the student's profile and resume, and tracks each application, including a guided flow for large-company (Workday) career sites that fills the form and hands the final step to the user.
- Added product and operations features: Gmail sync that alerts students to company replies, resume tailoring against a pasted job description with accept/reject suggestions, a referral program with rewards and apply-limit bonuses, and a super admin portal with an ads studio and a maintenance master switch.
- Led a full frontend redesign into a consistent design system with light/dark mode and mobile-first layouts, and removed placeholder and unverified claims from the UI ahead of release; owned the extension build, deploy, and verification pipeline end to end.
- Took over the **Karnish Travels** admin and accounting platform (MERN), ran an end-to-end functional and API test, wrote the QA report, and deployed it to production on DigitalOcean with automatic deploys from GitHub.

AWS Cloud Virtual Internship **Feb 2024 – May 2024**
AICTE – Eduskills *Chennai, India*

- Designed and deployed cloud-based applications using EC2, S3, and Lambda; configured IAM roles and least-privilege policies for secure access control.
- Monitored application performance and set up alerting with CloudWatch, and implemented cost-optimization strategies across compute and storage resources.

Discipline Convenor **2022 – 2026**
SRM University – Directorate of Student Affairs *Chennai, India*

- Managed discipline and conduct processes for 500+ students, serving as the primary liaison between the student body and university administration on conduct-related matters.
- Coordinated cross-functional campus activities with faculty and administrative stakeholders, strengthening organizational, communication, and stakeholder-management skills.

Projects

AutoHirU (Lexon IT Internship) : *Next.js, TypeScript, Tailwind, Clerk, PostgreSQL, Chrome Extension, Railway* | autohiru.com

- Built and deployed a job-application platform with a student portal, recruiter portal (candidate search with filters, job offers, interview links, email outreach), secure admin console, and Chrome extension that fills applications from saved profiles and tracks application status.
- Implemented Workday guided-fill, JD-based resume tailoring, Gmail reply alerts, referrals and usage limits; deployed the Next.js frontend and the API with PostgreSQL on Railway, served on the custom domain autohiru.com.

Karnish Travels (Lexon IT Internship) : *React, Node.js, Express, MongoDB, Socket.io, JWT, DigitalOcean, Vercel*

- Prepared a Dubai tourism back-office platform for production, covering attractions, tickets, tour builder, sales, reports, and Books accounting (VAT, expenses, P&L, balance sheet).
- Performed end-to-end browser and REST API testing, documented QA findings, cleaned up routing, and deployed the Express/Socket.io backend to DigitalOcean with GitHub-triggered CI/CD.

ShipGuard AI : *Spring Boot, Next.js, PostgreSQL, Neo4j, Qdrant, LLM Agents* | Live Demo | Github

- Built an AI security-triage platform that converts Semgrep, ESLint, and gitleaks output into prioritized, LLM-explained findings cross-verified across models to reduce false positives.
- Used Neo4j to map code-dependency blast radius and Qdrant for similar findings; deployed the Spring Boot agent pipeline across Cloudflare Workers, Render, PostgreSQL, and Neo4j.

NRT AI : *Next.js, TypeScript, Cloudflare Workers AI, LLM Tool-Calling* | Live Demo | Github

- Built an always-on AI assistant supporting chat, web search, image generation/understanding, code execution, and voice input using Llama 3.3 70B, Moondream, and Flux.
- Implemented an OpenAI-style tool router, DuckDuckGo/Wikipedia fallback, and per-IP rate limiting with Cloudflare KV; deployed on the Workers AI free tier.

LayoutIQ : *Next.js, TypeScript, Cloudflare Workers, PDF Parsing* | Live Demo | Github

- Built a Licensed Town Planner compliance tool that parses APDPMS layout PDFs and validates plot dimensions, road widths, and open spaces against AP DTCP/UDA rules.
- Added regulation-cited violation explanations, parse-confidence flags, downloadable reports, fee estimation, and CSV export; deployed on Cloudflare Workers.

Android Malware Detection System : *Python, Flask, Scikit-learn, Random Forest* | Live Demo | Github

- Trained a Random Forest model on 10 network-traffic features, using RobustScaler to classify Android traffic as benign or malicious and evaluating precision, recall, and F1.
- Deployed a Flask REST API on Render with Gunicorn; extended the project into an IEEE-format paper presented at ICICST 2026.

Web-Based Health Diagnosis System : *Java, JSP/Servlets, MySQL, Docker* | Live Demo | Github

- Built a Java/JSP/Servlets health-diagnosis application using MVC, with patient-data upload and ML-assisted diagnosis.
- Added dataset preprocessing, compared CNN and LSTM using accuracy/precision/recall/F1, and deployed with Docker on Render and TiDB Cloud.

Water Quality Prediction System : *Python, Scikit-learn, Pandas* | Live Demo | Github

- Built a water-quality classifier using pH, dissolved oxygen, BOD, turbidity, and conductivity for faster screening of Ganga River water.
- Engineered features from noisy sensor data and compared Scikit-learn models with an 80/20 split using accuracy, precision, and recall.

Certifications

- **Oracle Certified Java SE 11 Developer,** *Oracle* | Link
- **Oracle Certified Foundations Associate – Agentic AI,** *Oracle* | Link
- **ServiceNow Certified Application Developer (CAD),** *ServiceNow* | Link
- **ServiceNow Certified System Administrator (CSA),** *ServiceNow* | Link
- **Alteryx Designer Advanced Certification,** *Alteryx* | Link

Publications

- **"Android Malware Detection Using Static and Dynamic Analysis"** – *ICICST 2026, Dr. B.R. Ambedkar NIT Jalandhar*, Apr 2026. IEEE-format paper on AI-driven mobile security combining static/dynamic analysis with ML.

Education

SRM Institute of Science and Technology — **Sept 2022 – May 2026**
B.Tech in Computer Science and Engineering — ***CGPA: 8.64/10*** — *Chennai, India*

Narayana IIT Academy — **Apr 2020 – Jun 2022**
Secondary Education (12th) — ***68.8%*** — *Nellore, India*

Sri Chaithanya Techno School — **Jun 2019 – Jul 2020**
10th Standard — ***99%*** — *Nellore, India*
